# Firefly Life Cycle

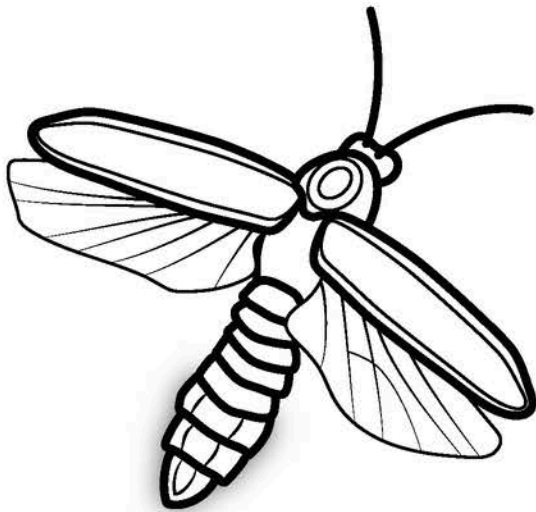

Big Dipper Firefly  
*Photinus pyralis*

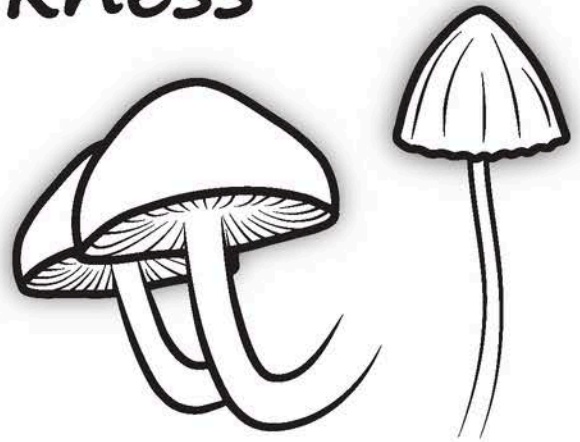

# A Light in the Darkness

## Bioluminescent Creatures

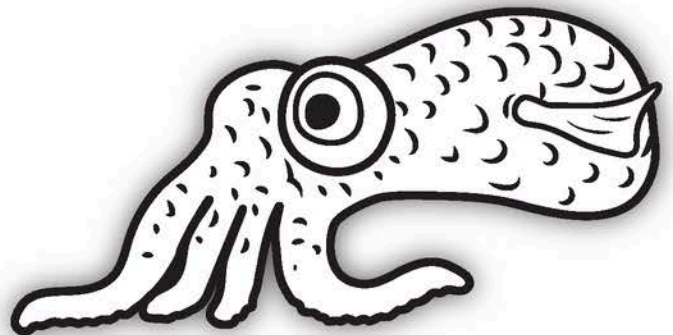

*Fireflies*

Uses flashes or glows of bioluminescent light to communicate with their mates.

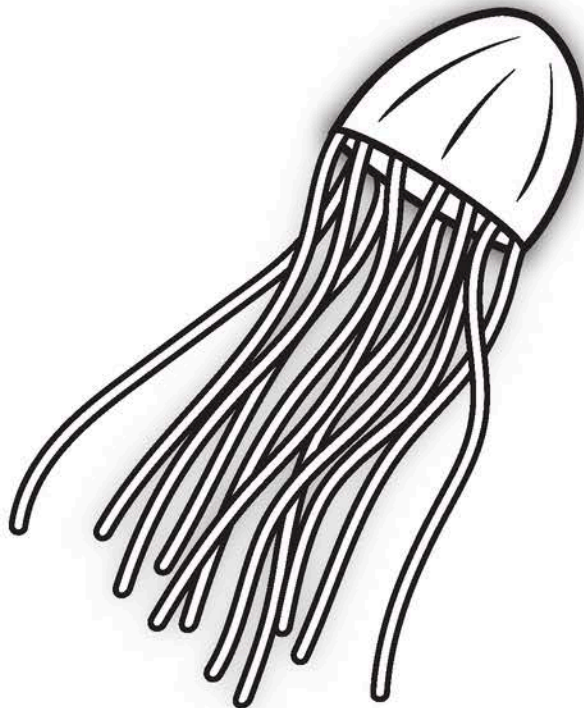

*Fungi*

Glowing fungi attract helpful nocturnal insects who carry their spores to new locations.

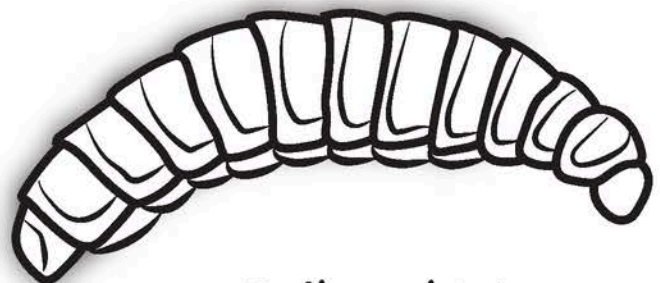

*Squid*

Uses light as a lure to attract prey.

*Jellyfish*

The bioluminescent glow signals that predators should stay away!

*Railroad Worm*

Females emit a green glow from bioluminescent spots.
